1 p.m. MDT :: Bar JV Sale Barn :: North of Sidney, Montana

Selling:
104 :: Angus Bulls
40 :: Purebred Heifers (papers available)
60 :: Commercial Angus Heifers
14 :: F1 Baldy Heifers

DVAuction Broadcasting Real-time Auctions

BAR JV ANGUS

Welcome

Welcome to our 2021 production sale. We would like to take this opportunity to thank you for your interest in our program.

Much of the information in this letter may seem repetitive, but even after 46 years our goals and philosophies have remained the same. Raising functional efficient cows that will stay in your herd and raise a big calf year after year. We have a strict culling program for our cows. Our goal is for the cows stick around and perform for many years. Currently, we have eight ten- to thirteen-year-olds still making the pathfinder report, proving longevity and performance in our herd. With all the new technologies available to us, our selection criteria continue to remain the same. We put an emphasis on calving ease, length, and bone in our cattle along with good feet and udder quality.

The bulls represent the top 55% of our calf crop. We realize that every bull doesn't deserve to stay a bull that is why we castrate a large percentage of our calves. This year's offering is one of the most uniform we have had to date. There is a large selection of Heifer Bulls and an outstanding set of Power Bulls that will add pounds to your calf crop. We have several new sire groups that we are impressed with and will offer an outcross pedigree.

We worked with Tyler Melroe of Hubbard Feeds to develop a ration for our bulls again this year. We feed the bulls a high roughage ration consisting of alfalfa, grass hay, silage, whole oats, and whole corn in our own feedlot here at the ranch. We choose not to push our bulls on feed. We want them to gain about 2.75 to 3 pounds per day. This ensures that they will last for many years. Flax-Lic tubs are also offered to improve semen quality.

We encourage you to go to www.barjvangus.com to view videos of the bulls. Our bulls are fertility tested and carcass ultra-sounded by Dr. Gary Scheiber and Dr. JJ Hovde, respectively, of High Plains Veterinary Clinic in Sidney, Montana. A supplement sheet with yearling weights, carcass, and scrotal information will be available on Sale Day.

This year's offering of heifers is expected to weigh in the 800-pound range. They are feminine, broody and should make exceptional mama cows.

Please come by the ranch anytime to view the bulls, heifers, or the cows. We would love to show you our operation. We are always happy to discuss any questions you may have about our program or the cattle. If you are unable to attend, please do not hesitate to call us or one of the representatives to help you with bull selection or your bids. The sale will once again be broadcast live on DV Auction. You have the option to register and bid with them as well.

Thank you for your continued loyalty and support. We value your trust and confidence in us here at Bar JV Angus.

We look forward to seeing you on sale day.

The Vitt Family,

Jim *and* **Loretta** :: **Dale** *and* **Jill** :: **Cody** *and* **Sierra**

Annual Production Sale

TUESDAY, MARCH 23, 2021

1 p.m. MDT • Bar J V Angus Ranch and Feedlot

Selling:

104 :: Angus Bulls
40 :: Purebred Heifers (papers available)
60 :: Commercial Angus Heifers
14 :: F1 Baldy Heifers

Auctioneer:

Joe Goggins ..... (406) 373-6844

DVAuction Broadcasting Real-time Auctions

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

1) Visit the DVAuction web site at www.dvauction.com
2) Click on the "Register" tab
3) Enter a user name, password and your contact information.
4) Click on "Apply for Bidding."
   - Select the sale from the list of other auctions and click "Apply".
   - Complete the process by filling out the Banking & Lending information requested.
   - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
   - If you would prefer to be approved using your credit card, call (402) 316-5460.
   - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Guarantee

Bar JV Angus are providing a first-year breeding season guarantee on all bulls selling for $3,000 or more. Breeding season is defined as the 90-day period following turnout. While we do everything within our power to ensure the bulls are sound breeders, sometimes things happen. If a bull is found to be an unsound breeder, a replacement will be provided if one is available. Otherwise full credit will be given in the following year's sale. Other injuries will be covered 50% of the value of the bull less salvage value to be used the following year. All injured bulls must be diagnosed by a licensed veterinarian. The owners reserve the right to have our vet inspect the injured bull. Please notify the owner as soon as possible should injury occur and prior to the bull being sold for salvage. The guarantee does not cover any treatable condition such as foot rot, pinkeye, etc. If neglect by the owner is shown on a treatable injury, no credit will be given. All claims must be made by September 30.

Mortality insurance will be available through:
Tom Holland, Payne West Insurance..... 406-683-6882

Liability:

All persons who attend the sale do so at their own risk. Bar JV Angus assumes no liability, legal or otherwise, for any accidents which may occur.

Registration Papers

All bulls selling are registered. Papers on the bulls will be transferred upon request.

The buyer has the option to register the heifers for an additional $200 over the purchase price.

Bar JV Angus reserves the right to retain a 1/3 semen revenue sharing interest in any of the bulls selling. Full salvage value belongs to the buyer. If the seller would wish to collect semen on any of these bulls, it would be at Bar JV's expense and the buyer's convenience.

Fertility and Physical Exam

Complete breeding soundness exams and semen evaluations have been conducted by High Plains Veterinary Clinic. Exam reports are available for inspection. Yearling information, scrotal measurements and ultra-sound data will be available sale day.

Delivery:

Free delivery for the first 750 miles. A $100 credit per bull will be given if you take your purchases home with you sale day.

Heifers are responsibility of buyer as soon as sold. If you need help with trucking we can be of assistance.

Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call or send their bids in to Dale or Jim or any of the representatives listed. If the bull(s) purchased are not as presented, the purchased bull(s) can be returned to thw owner at no cost to the buyer.

EPDs:

The EPDs are current as of February 19, 2021.

PRE-SALE

Please feel free to come out Monday evening to view the cattle and join us for dinner.

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLink℠ combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves.
From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

Group Age & Source: Verifies the group age and source of the cattle

Angus-Sired Genetics: Verifies calves are sired by 100% registered Angus bulls

Non-Hormone Treated Cattle: Verifies cattle have never received hormones

NeverEver³: No antibiotics, no hormones, no animal by-products ever

Cattle Care & Handling: Documents proper management, demonstrates quality commitment

Calf Management: Documents preventative health program

Genetic Merit Scorecard℠: Measures the genetic merit of calves for feedlot performance and carcass merit.
**Optional, not part of the PVP claims*

Easy and affordable, our customer service representatives walk you through the process.

Birth Weight & Calving Ease

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions:

1. The birth weight itself influences calving ease by 65%.
2. The female has 60-70% influence on the birth weight of her calf.
3. The bull has 30-40% influence on birth weight of his progeny.
4. Pelvic measurement and angle as well as the shape of the calf have 35-40% influence on calving ease.
5. Length of gestation greatly affects birth weight. A fetus can gain over one pound per day in the last days of gestation.
6. Weather and temperature the last 30 days affect the length of gestation.
7. Size and maturity of the cow influence calving ease.

Most commercial producers do not take birth weights. Guessing is as inaccurate as driving with a broken speedometer – what's thought to be 55 mph may in fact be 65 or 70 mph, and what's thought to be 70-80 lb. may actually be 80-90 lb. Remember, everything is relevant. Increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lb. at birth to finish at 1200-1250 lb. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus, a 1200 lb. cow should give birth to a 96 lb. calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

Angus bulls have long been known for their paramount calving ease. If you are breeding heifers, Angus in the go-to breed of choice. But what about the so-called "big" birth weight Angus bulls – where do they fit in? The vast majority of mature cows calve unassisted – it is pretty rare for a mature cow to need assistance, except for abnormal deliveries (backwards, breech, twins, etc.). Data reported to the AAA shows that 99% of Angus cows, second calf or beyond, calf unassisted and only 1% need some type of assistance (abnormal deliveries excluded from this data). Back to the question at hand: where do the "big" birth weight Angus bulls fit in? Example: If you have a bull with a Birth EPD of +5, he would be 3.2 pounds heavier than the average (breed average BW EPD 1.8) (5-1.8 = 3.2 pounds difference). However, his superior growth EPDs mean he will wean bigger calves and put way more money in your pockets than the average Angus bull! The moral of the story: If you are breeding mature cows to an Angus bull, don't make birth weight be your focus.

BUILDING A FOUNDATION FOR BEEF PERFORMANCE THROUGH NUTRITION

WHAT IS Blueprint® BEEF?

- Blueprint research supports heavier weaning weights and enhanced beef cow-calf immunity and fertility.
- Features exclusively Bioplex® organic trace minerals.
- Bioplex organic trace minerals resemble those found naturally in plant proteins.

MOUNTAINVIEW INSURANCE

COMMERCIAL HEIFERS

40 Purebred Angus Yearling Heifers

- The heifers are bred similar to the bulls selling.
- All have had Lepto/Vibrio, BVD and pinkeye vaccinations.
- They are freeze branded and ready to breed.

They will sell in groups of five with the option to go as deep as the buyer wants. Buyers have the option to buy registration papers at $200 per head.

74 Commercial Angus and F1 Baldies

60 Head Commerical Angus

These heifers come from our commercial herd. These heifers are not branded. They will have had Lepto/Vibrio, BVD and pinkeye vaccinations.

14 Head F1 Baldies

Raised on our ranch mostly out of registered cows and are sired by TH Victor 719T.
These heifers are not branded. They will have had Lepto/Vibrio, BVD and pinkeye vaccinations.

The heifers will sell first at 1 p.m. MDT SHARP!

Bulls will follow in catalog order.

Maybe the best Resolution we have ever raised. He's an extra-long, smooth-made bull. Calving ease combined with added growth. This bull is really gentle.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

$VALUE INDEXES

$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The $Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value ($M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on $M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value ($W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on $W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value ($EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing $EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value ($F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value ($G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value ($B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

Bar JV Angus is proud to announce our newest addition to our low maintenance, maternal program—Sitz RESILIENT 10208. Sitz RESILIENT 10208 is as complete as you can make a bull. He is phenotypically perfect and has an excellent EPD profile. RESILIENT is an excellent choice for any herd, including those at elevation, with a PAP score 37. He is backed by generations of calving ease, fertility, foot quality and a maternal pedigree to build a cow herd around. Sitz RESILIENT 10208 is a strong cornerstone for any program, put him to work for you.
